## Walter Goins Burch

OCT 1, 1930 - MAR 27, 2012

**W**alter G. Burch of North Highlands peacefully passed away at his home on Tuesday morning the twenty-seventh of March. Born in Baton Rouge, LA on the first of October in 1930, he was eighty-one years old. Walter was preceded in death by his parents, Walter Burch and Camille Stewart, as well as siblings; Van, Sue, Betty, Eddie, Stewart and Robert. Baptized at an early age, he was re-baptized in 2001 as a member of the Faith Fellowship Community Church. He loved to sing and study the Bible. Walter also enjoyed traveling and academic pursuits. He had a passion for scholarly reading, playing cards and musical keyboards. Joining the Air Force in 1949, after twenty-one years of service, Walter G. Burch retired as a Sr. Master Sergeant. Moreover, he continued serving his country as a civil servant for another twenty years at McClellan Air Force Base. Formerly married to Naomi Beshears, he was the proud father of four children; Cynthia, Mark, Brian and Bradley. Walter leaves behind six grandchildren, three great grandchildren and a host of nieces and nephews. While attending church in 2002, Walter met and married his lovely wife, Phyllis. She has been faithfully by his side throughout their inspiring marriage. Walt loved to smile and speak kind words to everyone. He was charming, a witty storyteller who relished a good laugh. He will be missed greatly: yet, he will not be forgotten for his courage, perseverance, thoughtfulness, intelligence and gracious manner. Walter humbly gave his all to God, life, country and people. Friends and family are welcome to participate in the services held on Tuesday, the third of April, at Faith Fellowship Community Church. The location is 5937 Watt Ave, North Highlands, CA, 95660. The viewing is at 10 am and at 11am service begins. Walter G. Burch lives on in our memories and hearts forever.

Cheap VPS or virtual private server is the ultimate solution to costly maintenance web servers. In fact, virtual private server is more advanced than shared hosting & is more like dedicated server, but to emphasize, at a much lower cost. The low cost of virtual private server is the significant difference between shared web-site hosting and dedicated server. A slightly advanced than shared website hosting and has the features of a dedicated server, but it is way cheaper than a dedicated server. The financial advantage of using virtual private server is not the only advantage it could give to its customers or users. Explained below are the additional advantages and disadvantages of using cheap virtual private servers. Advantages of Cheap VPS: The first thing that you could get from your individual virtual private server is the root access to your server. It means that you can have access to the root level of the hosting server. Thus, you have the ability to put in & configure any programs you require. Additionally, you can also host a limitless number of net sites through Apache's virtual hosts & manage them efficiently. Not only this, but you can also host other services, such as a mail server, an FTP server, or any type of server you want. You may even use VPS for file storage or as a backup for all of your files. Since VPS is isolated from other sites present on the physical server, it is secured that no harmful script or application used by other webmaster, that can harm your website. Disadvantages of Cheap VPS: There are definite disadvantages in using cheap VPS or virtual private servers. For, you cannot get managed servers. This means that in case you have no idea how to set up & configure your own VPS, it is a huge disadvantage. This disadvantage leads us to get another disadvantage, that is, you are solely responsible of all the installation, maintenance, security measures and updates on your VPS. Thus, in the event you do not possess the high-proficiency in using the VPS to control the working of the net site, the applications used, & the server resources skillfully, you will have a major issue & your VPS becomes unmanageable. Additionally, cheap VPS hosting designs might give you a whole operating process of your own to work with, you still share hardware resources with other VPS users on the host server. Therefore, in the event you are jogging intensive programs that need high performance, you may need to make use of other technique of website hosting, such as co-location or a dedicated server. Remember, the great features & capabilities of the dedicated server are available for pricey fees to you. So if your web-site does not need high finish performance, cheap VPS are ideal for you. They are economical, efficient and offer excellent benefits for your website. Therefore, cheap VPS or virtual private servers can be reliable, but since it on a budget plan, do not expect as much as you would from expensive VPS plans.
